

Basic PA6000 Quick Installation Instruction

Turn operator(s) and PA6000 unit AC & Battery DC power off.

A. Communication Setup:

Hardwiring To Gate Operator Connection:

1. Connect T-Mobile/AT & T SIM card.
2. Connect Unit NO1 to STRIKE on operator main board. Connect unit COM1 to GND on operator main board.

Wireless To Gate Operator Connection With Platinum Radio Receiver:

1. Connect T-Mobile/AT & T SIM card.
2. Connect Platinum radio receiver to the Radio terminal on the BLGOC-2400 operator main board.
3. Open the radio receiver cover.
4. Turn on the power for the PA6000 and Platinum Gate operator.
5. Program an any 4 digi entry code(1234) with the PA6000 keypad. Then switch the program switch back to Normal mode.
6. Next press down the radio receiver learning button. Within 5 second you enter the entry code(1234) that you have just created. Now the PA6000 unit should pair with the radio receiver now.
7. You can enter the code(1234) to test the pairing is successful, or not. If not, you need to repeat step 5 and step 6.
8. If the pairing is good. Turn off all the power for now.

Wireless To Gate Operator Connection With Platinum MSLink Module:

- 1.** Connect T-Mobile/AT & T SIM card.
- 2.** Plug in the MSlink module into the BLGOC-2400 operator main board. Set the MSlink module dip switches to match the MSlink module dip switches on the PA6000 main board.
