

PLATINUM ACCESS SYSTEMS, INC.

BLSL5060

Heavy Duty Commercial and Industrial Slider

The BLSL5060 slider built with its ultra-quiet high torque powerful 48VDC brushless DC motor is the first choice for commercial application. This full features state of the art operator uses a 120/220VAC single phase main power source and utilize a very high efficient and very reliable switching power supply to supply the proper voltage for operation.

This operator is design to operate in any climate. It does not require a gearbox, or a battery heater to operate in -20F. Temperature is lower than -20F require a battery heater and below -40F also requires a gearbox heater as well.

The optional chain routing under the sprocket for extra chain clearance for non-raised pad mounting

These unique engineering innovations backed by the safety and reliability of the most advanced control board in the industry ensure a smooth operation for any Platinum Access Systems' operator.

Specification	Data		
Speed Control:	This operator can control the speed on uphill downhill gate. It keeps the speed constant.	Dimension:	25" x 15" x 27" H
Manual Release:	Back Drivable Optional Fail Safety	Main Power:	110/220VAC Single Phase. 2000Watt, 48VDC Switching Power Supply, Auto Selected Built-in 48VDC Battery Backup 12AH 12V DC X 4
Gate Capacity:	Maximum Gate Weight 5000 lbs. Maximum Gate Length 60ft. 12" per second		
Mechanical:	Gear reducer Size 70 Chain Size 50	Compliance:	Pending
Motor:	Brushless Continuous Duty Instant Reversing 48V DC	Warranty:	<div style="text-align: right; font-size: small;">Residential Commercial</div> Brushless Motor: 10yrs. 6yrs Parts: 8yrs. 5yrs
