

PLATINUM ACCESS SYSTEMS, INC.

BLSW1016

COMMERCIAL SWINGER

The **BLSW1016** with its ultra-quiet high torque brushless DC motor is the first choice for Residential/Commercial applications. This full features state of the art operator uses a 120/220VAC single phase main power source and utilizes a high efficient switching power supply to supply the proper voltage for operation. The operator is equipped with a built-in 24VDC battery backup system and it can operate with a direct solar panel connection as well.

This operator is designed to operate in any climate; it does not require a gearbox or a battery heater to operate in -20°F. Temperature between -20°F and -40°F require a battery heater and below -40°F it requires a gearbox heater as well.

These unique engineering innovations backed by the safety and reliability of the most advanced control board in the industry ensure a smooth operation for any Platinum Access Systems' operator.

Specification	Data	Specification										
Manual Release	Release Handle/Back Drivable Optional Fail Safety	Dimension:	20.5" x 18.5" x 23" H									
Gate Capacity	Maximun Gate Weight Legth 1200 lbs 16' 1600 lbs 12' 90° Opening in 13-18 Seconds (Max @ 120°)	Main Power:	120/220 VAC Single Phase On/Off Switch Built-in 24V DC Battery Backup (7AH 12V DC x 2)
